

## RFQ N° UNFPA/UGA/RFQ/22/004 – Request for a Consulting Firm (Re-advert)

UNFPA, the United Nations Population Fund, works to deliver a world where every pregnancy is wanted, every childbirth is safe and every young person's potential is fulfilled. It is also the leading United Nations agency that supports the Government of Uganda to generate data for planning and decision-making, ensuring empowerment of women, adolescents and young people to live their dream and fulfil their potential.

UNFPA Uganda started its Ninth Country Programme (CP) in 2021. The Country Programme is being implemented under the three outcomes namely: Sexual and Reproductive Health and Rights (SRHR); Gender Equality and Women Empowerment (GEWE); and Population Dynamics. Under the SRHR Outcome, there two Outputs including: (i) increasing access to integrated SRHR/GBV/HIV services; and (ii) empowerment of the women and young people to demand for and utilize SRHR information and services. Each of the GEWE and Population Dynamics outcomes has one Output, namely: strengthening capacity to prevent and respond to SGBV and other harmful practices; and strengthening population data systems respectively.

To ensure effectiveness and efficiency for the Ninth Country Programme, the Implementing Partners (IPs) need to be appropriate and managerially and technically equipped to implement the programme activities that are stipulated in the Country Programme Document. Therefore, it is imperative to review the performance of the current IPs to identify the most appropriate IPs in line with Country Programme priorities and aspirations.

The purpose of the IP review exercise is to learn from the 2021 performance, especially on the areas of strengths for consolidation and issues of weakness for improvement; and assess the appropriateness (Fit for Purpose) of the 2021 IPs in effectively and efficiently advancing 2022 Country Office aspirations. The information generated is to be used to assist the IPs to improve on their performance during the year 2022 and to identify appropriate ways of working with them according to their respective comparative strengths.
