1. Results Framework

Development Engagement Objective
The objective of the development cooperation among the parties is to empower women and young people in northern Uganda, including refugees, to contribute to their own and their communities’ development through an integrated approach to gender equality, SRHR and GBV services and socio-economic empowerment.

For Danida’s reporting purposes the following key outcome and output indicators have been selected to document progress:

<table>
<thead>
<tr>
<th>Outcome Framework</th>
<th>Enhanced utilization of SRHR and GBV services among young people and women in Northern Uganda, including refugees, for healthy and productive lives.</th>
</tr>
</thead>
</table>
| Outcome indicator 1 | Number of beneficiaries\(^1\) served with SRHR services\(^2\) in target health facilities in the past 12 months.\(^3\)  
(Source: HMIS database) |
| Baseline Year | 2016 | 791,421 |
| Target Year | 2022 | 1,591,830\(^4\) |
| Outcome indicator 2 | Number of beneficiaries\(^5\) receiving multi-sectoral GBV response services\(^6\) in the target districts in the past 12 months.  
(Sources: Medical services – HMIS, psychosocial and legal services – NGBVD, safety and security services – police records). |
| Baseline Year | 2016 | 568\(^7\) |
| Target Year | 2022 | 19460 |
| Outcome Indicator 3 | Percentage of women age 15-19 who have begun childbearing in the target districts.  
(Source: UDHS) |
| Baseline Year | 2016 | 23% of women in Acholi and 22% in West Nile have begun child bearing (UDHS, 2016). |
| Target Year | 2022 | 20% of women in Acholi and West Nile have begun child bearing (UDHS 2021) |
| Output 1 | Women and young people are empowered to demand their SRHR and gender rights and to access socio-economic asset building opportunities |

---

\(^1\) Disaggregated by following beneficiary groups: refugee women (25-49 years), host community women (25-49 years), refugee young people (10-24 years), host community young people (10-24 years).

\(^2\) Defined as the aggregated number of FP, ANC and HIV counselling services reported.

\(^3\) Defined as the health facilities operating within districts supported by the WAY program, and reporting through HMIS.

\(^4\) Assumption for targets - percentage increase for 2015-2016 is 11% (DHIS 2) with Programme Interventions, we expect it to go up by 15% per year.

\(^5\) Disaggregated by following beneficiary groups: refugee women (25-49 years), host community women (25-49 years), refugee young people (10-24 years), host community young people (10-24 years).

\(^6\) Defined as medical, psychosocial, legal justice and safety and security response services.

\(^7\) 2016 data from districts of Adjumani, Yumbe, Kitgum, Amuru, and Arua.
| Output indicators | 1.1 Number of beneficiaries in the target districts reached through WAY programme community engagement activities\(^8\)  
(Source: Activity reports) |
|-------------------|---------------------------------------------------------------------------------------------------|
|                   | 1.2 Number of women who have reported sexual, physical and/or psychosocial violence in the target districts in the past 12 months.  
(Source: NGBVD) |
|                   | 1.3 Percentage of all women and men age 15-49 years in target districts who agree that a husband is justified in hitting or beating his wife for specific reasons.  
(Source: UDHS) |
| Baseline 2016     | 1.1 Zero beneficiaries  
1.2 347 women reported sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 66% of women and 25.1% of men age 15-49 years in West Nile and 42.1% of women and 59.3% of men age 15-49 years in the North (UDHS) |
| Target 2018       | 1.1 143,052 beneficiaries (annual)  
1.2 638 women will report sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 No measurement |
| Target 2019       | 1.1 142,020 beneficiaries (annual)  
1.2 734 women will report sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 No measurement |
| Target 2020       | 1.1 143,052 beneficiaries (annual)  
1.2 844 women will report sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 63.6% of women and 16.3% of men age 15-49 years in West Nile and 36.8% of women and 60.8% of men age 15-49 years in the North (UDHS) \(^9\) |
| Target 2021       | 1.1 142,020 beneficiaries (annual)  
1.2 971 women will report sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 No measurement |
| Target 2022       | 1.1 142,020 beneficiaries (annual) – 365,904 cumulative years 1-5  
1.2 1116 women will report sexual, physical and/or psychosocial violence in the target districts in 2016  
1.3 61.2% of women and 7.6% of men age 15-49 years in West Nile and 31.6% of women and 62.2% of men age 15-49 years in the North (UDHS) |
| Output 2          | Duty bearers provide integrated and quality SRHR and GBV information and services which are responsive to the needs of women and young people. |

\(^8\)Disaggregated by age group (10-24, 25-49, 50+), sex and district. Community engagement activities include: young people's clubs, women safe spaces, community mentors, generation-to-generation dialogues, SASA activists, and male action groups.

\(^9\) Targets are calculated as follows; (i) improvement trend is calculated by comparing 2006 and 2011 UDHS data, (ii) a 30% positive programme impact is applied to the projected trend.
### Output indicators

**2.1** Number of service providers\(^{10}\) in target districts trained in youth-responsive services, rape management and psychosocial support in the past 12 months.  
(*Source: Activity reports*)

**2.2** Percentage of 10-24 year olds among new users of modern contraception methods in target districts in the past 12 months.  
(*Source: HMIS*)

**2.3** Number of GBV cases managed or resolved as a percentage of cases reported\(^{11}\) in target districts in the past 12 months.  
(*Sources: National GBV Database and SAUTI Helpline*)

| Baseline | 2016 | 2.1 131 service providers trained in rape management and psychosocial support.  
2.2 52% 10-24 year olds among new users of modern contraception methods in target districts.  
2.3 408 cases managed as 41 percentage of cases reported |
| --- | --- | --- |
| Target | 2018 | 2.1 436 service providers trained in youth responsive services, rape management and psychosocial support.  
2.2 55% 10-24 year olds among new users of modern contraception methods in target districts  
2.3 45% of GBV cases reported |
| Target | 2019 | 2.1 455 service providers trained in youth responsive services, rape management and psychosocial support.  
2.2 58% 10-24 year olds among new users of modern contraception methods in target districts  
2.3 49% of GBV cases reported |
| Target | 2020 | 2.1 0  
2.2 61% 10-24 year olds among new users of modern contraception methods in target districts  
2.3 54% of GBV cases reported |
| Target | 2021 | 2.1 0  
2.2 64% 10-24 year olds among new users of modern contraception methods in target districts  
2.3 59% of GBV cases reported |
| Target | 2022 | 2.1 0  
2.2 67% 10-24 year olds among new users of modern contraception methods in target districts  
2.3 64% of GBV cases reported |
| Output 3 | | Young leaders are identified and nurtured to develop and implement breakthrough solutions for the improvement of SRHR and GBV outcomes |

\(^{10}\) Disaggregated by district, service provider type by sector, and training focus.

\(^{11}\) As captured in the National GBV Database and the national SAUTI Help Line. It is assumed that the programme will contribute to a 5% positive impact every programme year based on the improvement trend calculated by comparing 2015 and 2016.

\(^{12}\) Targets are calculated as follows; (i) improvement trend is calculated by comparing 2015 and 2016 HMIS (ii) a 3% positive programme impact is applied to each programme year.
<table>
<thead>
<tr>
<th>Output indicator</th>
<th>3.1 Number of young people supported by the programme to lead on SRHR/GBV social change in the target districts over five years.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Baseline 2016</td>
<td>Zero young people supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
<tr>
<td>Target 2018</td>
<td>120 young people (8 teams each made up of 5 young people) and 10 champions per districts supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
<tr>
<td>Target 2019</td>
<td>120 young people (8 teams each made up of 5 young people) and 10 champions per district supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
<tr>
<td>Target 2020</td>
<td>160 young people (8 teams each made up of 5 young people) and 10 champions per district supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
<tr>
<td>Target 2021</td>
<td>160 young people (8 teams each made up of 5 young people) and 10 champions per district supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
<tr>
<td>Target 2022</td>
<td>160 young people (8 teams each made up of 5 young people) and 10 champions per district supported to lead on SRHR/GBV social change in the supported districts.</td>
</tr>
</tbody>
</table>

In 2020, new teams (5 people per districts) will be identified and supported. The programme will continue to support the selected teams in 2018 and the 10 champions throughout the programme life.
